Years of research into CBP[®] can be summed up in three little words: It works better.

Good DC's Know What to Do. Better DC's Know How to Do It. The Best DC's Know Why.

✓ Discover the “why” of chiropractic. Become a CBP® Certified DC.

The Techniques of Chiropractic BioPhysics® have been proven in practice for nearly 30 years. And, for the past 15 years they've been subjected to more clinical trials and the scrutiny of peer-reviewed research publications than any other chiropractic approach.

So it's safe to say that CBP practitioners know their stuff. And CBP certification shows they know it well. General CBP Certification involves attending 7 seminars to learn the fundamentals of CBP and successfully passing a test to demonstrate mastery of the methods.

Earn Advanced CBP Certification through additional training in 7 specialized seminars. Testing for Advanced Certification includes presenting a case using CBP procedures to peers at a CBP Annual Conference and verifying the use of CBP-related spinal rehabilitative equipment in your practice.

CBP Certified DCs are featured on our popular Chiropractic web site and patient-referral directory. Get started today. For more detailed information or to register, call or visit our web site.

New-2012 CBP General Certification Requirements:

- 1) Basics of CBP: Radiographic & Postural Protocols;
- 2) Mirror Image Drop Table Adj. Leg Length Inequality & Orthotics;
- 3) Mirror Image Instrument Adjusting & Upper Cervical Analysis;
- 4) Structural Rehabilitation of the Cervical Spine;
- 5) Structural Rehabilitation of the Lumbar Spine;
- 6) Structural Rehab of Thoracic Spine & Case Management;
- 7) CBP Hands on Training Workshop.

Basic Certification Test:

The Chiropractor must sit and pass a test of CBP theoretical and practical application. The test consists of written questions, x-ray analysis, postural analysis, and clinical intervention.

New-2012 CBP Advanced Certification Requirements:

In addition to the Basic Certification Requirements:

- 8) Pediatrics;
- 9) Neurology, Posture, & Systemic Health;
- 10) Scoliotic Deformity Analysis & Management;
- 11) Whiplash Trauma
- 12) Advanced Full Spine Analysis & Techniques;
- 13) Spinal Biomechanics: Subluxation & Nerve Interference.
- 14) Attend CBP Annual and Present your Case Report

Advanced Certification Test:

The Chiropractor must prepare a case presentation. The doctor then will present the case to their peers at the CBP Annual Conference and in written form. The patient must be treated using CBP Technique protocols and procedures. The Chiropractor must submit a list depicting the types of CBP related spinal rehabilitative equipment in their clinic.
